

*“Initiative I-24 calls for a new program to let public officials in King County know, in detail and on an on-going basis, what their fellow citizens think about critical public issues. This is a winner. All thoughtful, conscientious citizens should understand instantly how this program—funded, without taxes, by voluntary donations—has the potential to considerably enhance the civic richness of our society. I strongly urge voters to support something of great value to us all. If this revolutionary bottom-up effort to help guide officials in King County works, it should be of great import for the future of the State of Washington, and perhaps eventually of the entire nation.... and even of others.”*
